Summary

Software Engineer building production-grade AI systems and scalable backend services. Currently developing LLM-powered incident automation systems at Keyloop, reducing MTTR and saving 10,000+ engineering hours annually. Top 3.5% globally on LeetCode, demonstrating strong problem-solving. Focused on agentic AI, distributed systems, and cloud-first architectures.

Work Experience

Keyloop India | Hyderabad

Associate Engineer (A.I. Enablement)

Jun 2025 – Present

- Architected and developed an **AI-driven incident management platform** integrating **Salesforce, AWS Bedrock, and XGBoost** to triage and resolve infrastructure incidents across **10,000+ servers**, enabling automation of **120,000+ annual cases** and saving **10,000+ engineering hours annually**.
- Designed autonomous incident workflows that **enriched infrastructure context, classified risk, orchestrated specialist AI agents, executed automated diagnostics, and routed cases between automated resolution and human escalation paths** based on confidence and operational policies.
- Developed a **FastAPI microservice** for automated IP and metadata resolution, integrated with CI/CD pipelines, saving **1,000+ engineering hours annually**.

Keyloop India | Hyderabad

Software Development Intern

Jan 2025 – Jun 2025

- Developed **infrastructure dashboards** to track critical KPIs (MTTR, MTTD), **improving performance review cycles by 25%** and saving **6+ hours/week** across teams.
- Designed a **Python ETL pipeline** for operational data, automating **SLA reporting and dashboard generation** and saving **48+ hours annually**.

Skills

Languages and Backend: Python, Java, SQL, JavaScript, FastAPI, REST APIs

LLM and AI systems: Qwen, Anthropic Claude, Prompt Engineering, LangChain, LangGraph, LangSmith, ChromaDB, Pinecone

Cloud, MLOps and Tools: AWS, Git, Docker, GitHub Actions, CI/CD, MLflow, DVC, Model Evaluation, Grafana

Machine Learning: PyTorch, Hugging Face Transformers, Scikit-learn, XGBoost, LightGBM

Core Competencies: Data Structures & Algorithms, System Design, Software Development, Debugging, Problem Solving

Projects

AI Customer Support SaaS Platform | *FastAPI, LangGraph, Redis, Docker, Grafana, LangSmith*

2026

- Built a multi-tenant **AI customer support SaaS platform** leveraging **RAG, vector search, and LangGraph orchestration** to automate ticket resolution and deliver context-aware customer assistance.
- Implemented **ticket management, conversation memory, role-based access control (RBAC), rate limiting, analytics dashboards**, with observability powered by **Grafana and LangSmith**.

Credit Risk Prediction | *Python, Scikit-learn, LightGBM, FastAPI, MLflow, DVC, Docker, AWS EC2*

2026

- Built an end-to-end risk model using LightGBM, optimizing for imbalanced data with **ROC-AUC, and precision-recall evaluation**, leveraging MLflow for experiment tracking.
- Designed REST APIs for model serving with MLflow and DVC, enabling **reproducible and production-ready ML workflows**.

Publications

Layered Security - Gradient Boosting Meets Naive Bayes for Intrusion Detection | Springer CIS 2025

2026

Education

Vasavi College of Engineering, Hyderabad

2021 – 2025

- Bachelor of Engineering, Information Technology*

CGPA: 9.04/10

Certifications

AWS Certified Cloud Practitioner (CLF-C02) | AWS

2026

Certified SAgE 6 Practitioner | SAgE by Scaled Agile

2026
